

Kirill Grinko

Personal

Hard skills C++, Algorithms & data structures, C, Assembly x86-64, Python, Git, CMake, Bash, Docker, Qt, SFML, Gitlab CI/CD, GoogleTest, LaTeX

Soft skills Hard-working, Quick-learning, Organised, Outgoing and collaborative

Languages English (B2), Russian (native speaker)

Hobbies Calisthenics, skiing, cycling, piano

Projects

Fall 2024 **Graphing Calculator**, *Github page (clickable)*, Used tools: C++, SFML, CMake
A graphing calculator and plotter application.

Fall 2024 **Algorithms and data structures course homework**, *Github page (clickable)*,
Used tools: C++
Solutions to competitive programming problems and implementations of various algorithms.

Fall 2024 **C++ course homework**, *Github page (clickable)*, Used tools: C++
Implementations of standard library data structures and solutions to various programming problems.

Spring 2024 **Box with molecules**, *Github page (clickable)*, Used tools: C++, Qt, CMake
A simulation of an ideal gas in an enclosed space, including a small research component to test the validity of the Maxwell distribution.

Fall 2023 **MBTI test**, *Github page (clickable)*, Used tools: Python, Qt, SQL
A program for taking the Myers–Briggs Type Indicator (MBTI) personality test.

Fall 2023 **Text editor**, *Github page (clickable)*, Used tools: Python
A simple text editor designed for use in an internet browser.

Education

2023 – present **Moscow Institute of Physics and Technology**, *finished 1st year bachelor*,
Overall GPA 8.5/10, Programming courses GPA 8.83/10
Phystech School of applied Mathematics and Informatics

2019 – 2023 **Moscow State School 57**, *8-11 grade*, GPA 5/5
Focus on physics and math. Graduated with federal and Moscow gold medals

Achievements

2022 – 2023 All-Russian Olympiad for schoolchildren in physics (Final stage participant, top 80 in country); Phystech (MIPT) Olympiad in physics (Gold); Rosatom Olympiad in physics (Silver); Moscow Olympiad for schoolchildren in physics (Silver)

2021 – 2022 Rosatom Olympiad in physics and maths (Gold, Silver); All-Russian Olympiad for schoolchildren in physics (Regional stage prize winner); Phystech (MIPT) Olympiad in physics and maths (Silver, Silver)

2020 – 2021 All-Russian Olympiad for schoolchildren in physics (Regional stage prize winner); Moscow Olympiad for schoolchildren in physics (Silver)

2019 – 2020 International Experimental Physics Olympiad (Bronze); Moscow Olympiad for schoolchildren in physics (Silver)

Extracurricular activities

- 2019 – 2023 **Olympiad Physics Classes**
Theoretical and experimental training for All-Russian Olympiad for schoolchildren in physics, organized by the Moscow City Department of Education.
- 2020 – 2022 **Yandex Lyceum**
Python programming classes for high school students. [More info \(clickable\)](#)
- 2021 **QuSoft Quantum Quest**
An online course on quantum computing for high school students, developed by Michael Walter and Māris Ozols. [More info \(clickable\)](#)

Courses taken

- MIPT Analytical Geometry; Introduction to Math Analysis; General Physics: Mechanics; Algebra of Logic, Combinatorics, Graph Theory; General Physics: Laboratory Practicum; Python Practicum; Linear Algebra; Multivariate Analysis, Integrals and Series; General Physics: Thermodynamics and Molecular Physics; Foundations of Abstract Algebra and Coding Theory; Programming Technologies; Multiple Integrals and Field Theory; Introduction to Probability and Measure Theory; Computers Architectures and Operating Systems; Discrete Structures; Differential Equations; Algorithms and Data Structures; Programming in C++
